2. Claims 1-36 are allowed.
3. The following is an examiner's statement of reasons for allowance:

-Regarding to independent claims 1, 13 and 25, none of prior art of record teaches or suggests an equalizing method and associated system wherein the method/system comprises procedures/devices of (a) using a kernel density estimate where different values of a kernel size are indicative of either a blind or a decision-directed equalization mode; (b) processing a received signal using a blind equalization mode; (c) evaluating, on a block or sample basis, an error measure based on a distance among a distribution of an equalizer output and a constellation; (d) updating the kernel size based upon the error measure thereby facilitating automatic switching between the blind and decision-directed equalization modes, where the kernel size is initially set to a value indicative of the blind equalization mode; and (e) selectively applying blind equalization or decision-directed equalization to the input signal according to the updated kernel size for subsequent iterations of procedures (c)-(e).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
